PROFESSIONAL PROFILE

Systems Engineer and IT professional with experience in software development, enterprise technical support, systems administration and cloud solutions. Since 2019, has developed and maintained applications with C#/.NET, SQL Server and REST APIs, while supporting users, services and infrastructure. Recent data center experience with Windows endpoints, software deployment, access management and incident resolution. Knowledge of Azure, AWS, Windows Server, Microsoft 365, Active Directory/Entra ID, virtualization and CI/CD. Adaptable to roles in IT, Systems and Cloud Administration, Technical Support and Full-Stack Development.

TECHNICAL SKILLS

Systems, administration & Microsoft 365: Windows 10/11, Windows Server 2016/2022, Active Directory, Entra ID, GPO, Exchange Online, Teams, SharePoint, OneDrive, PowerShell, IIS, VMware and Hyper-V.

Support, networking & security: Help Desk / IT Support, KACE SDA/SMA, PXE, ESET Protect/FDE, user and permission management, MFA, TCP/IP, VPN, software installation and updates, troubleshooting, inventory and documentation.

Web & software development: C#, .NET, ASP.NET, .NET Core, .NET 10 (current knowledge), REST APIs, React, Next.js, TypeScript, JavaScript, Node.js, HTML5, CSS3, Python and Git/GitHub.

Databases & integrations: SQL Server, T-SQL, ETL, PostgreSQL, MySQL, Amazon Aurora, DynamoDB, queries, stored procedures and systems integration.

Cloud & DevOps: Microsoft Azure (App Service, Functions, Azure SQL, Storage, Key Vault); AWS (Lambda, API Gateway, Cognito, S3, ECS, CloudWatch); Azure DevOps, GitHub Actions, CI/CD, Docker and Cloudflare.

PROFESSIONAL EXPERIENCE

IT Support Intern | eStruxture Data Centers Jul 2026 – Sep 2026
Montréal, Quebec

- Resolved Windows workstation, application, connectivity, access and permission issues in a data center environment with an inventory of approximately 550 devices.
- Supported device preparation and deployment with KACE SDA/SMA and PXE, software updates, application validation and endpoint security with ESET Protect/FDE.
- Investigated technical issues, documented solutions in KACE and Confluence, and worked in Windows, VMware and Hyper-V environments.

Freelance IT Consultant & Software Developer | Self-Employed Apr 2019 – Jun 2026
Longueuil, Quebec

- Designed, developed and maintained business applications and web services in C#/.NET and ASP.NET, using SQL Server, T-SQL and REST APIs to support operational processes.
- Implemented integrations, database queries and procedures; performed functional testing, troubleshooting, maintenance and application support.
- Administered and troubleshot web hosting, IIS, authentication, deployments and services related to Azure and AWS; used Git/GitHub and CI/CD practices.
- Gathered client requirements, documented technical changes and provided support for users and production systems.

Process Engineer | PDVSA – Petroleum Refinery May 2014 – Mar 2019
Puerto La Cruz, Venezuela

- Analyzed operational information, prepared reports and technical documentation, and coordinated process improvements with multidisciplinary teams.

ERP Analyst | PDVSA – Petroleum Refinery Mar 2013 – May 2014
Puerto La Cruz, Venezuela

- Provided functional support for ERP users, investigated incidents, tested systems and prepared business reports.

FEATURED PROJECTS

GiveSwap | Full-stack web application | **giveswap.com/**

- Developed responsive interfaces with React/Next.js and TypeScript, integrated with backend services through REST APIs.
- Implemented authentication and cloud workflows using AWS Cognito, Lambda, API Gateway, Aurora Serverless v2, DynamoDB, S3 and CloudWatch.

Solutions Multiservices | Multilingual business website | **solutionsmultiservices.ca/**

- Designed a responsive website in English, French and Spanish, with interactive quote, contact and recruitment forms.
- Integrated request references, Tawk.to support and deployments with Git/GitHub and Cloudflare; maintained the domain and website features.

Drones Latinoamérica | Technical web platform | **drones-latinoamerica.com/**

- Developed and maintained a portal for technology content, learning resources, simulators and technical demonstrations.
- Organized content and responsive web navigation to make information accessible on computers and mobile devices.

SysSign Inspector Pro & ClearZonePC | Windows tools in C#/.NET

- Developed desktop tools in C#/.NET for system diagnostics, process inspection and digital signature verification.
- Included storage review, software management and Windows troubleshooting features.
