SYSTEMS ENGINEER | CLOUD & IT ADMINISTRATOR | FULL-STACK .NET DEVELOPER

PROFESSIONAL SUMMARY

Systems Engineer and IT professional with experience supporting Windows endpoints, enterprise applications, access management and connectivity in a data center environment. Background in C#/.NET, SQL Server, IIS and web development, complemented by cloud administration and cybersecurity training. Familiar with Microsoft Azure, AWS, Windows Server, Active Directory / Entra ID, PowerShell, virtualization and CI/CD practices. Combines infrastructure troubleshooting, software development and user support to maintain reliable business systems.

TECHNICAL SKILLS

Systems & administration: Windows Server 2016/2022, Windows 10/11, Active Directory, Microsoft Entra ID, Group Policy (GPO), Microsoft 365, PowerShell, IIS, VMware, Hyper-V, endpoint support.

Cloud & DevOps: Microsoft Azure (App Service, Functions, Azure SQL, Storage, Key Vault), AWS (Lambda, API Gateway, Cognito, S3, Aurora, DynamoDB), Azure DevOps CI/CD, GitHub Actions, Docker, CloudWatch.

Security, networking & support: KACE SDA/SMA, PXE deployment, ESET Protect/FDE, identity and access troubleshooting, TCP/IP networking, application support, patching, software validation and technical documentation.

Software & databases: C#, ASP.NET, .NET Core, REST APIs, SQL Server, T-SQL, MySQL, PostgreSQL, Node.js, OAuth, Git/GitHub.

Web technologies: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, responsive UI, form validation.

PROFESSIONAL EXPERIENCE

IT Support Intern | eStruxture Data Centers | Montréal, QC | Jul 2026 – Sep 2026

- Troubleshot Windows endpoints, application errors, user permissions, identity/access issues and connectivity in a production data center IT environment supporting an inventory of approximately 550 PCs.
- Supported KACE SDA/SMA and PXE-based endpoint deployment, software updates, ESET Protect/FDE endpoint security and application validation.
- Configured 8x8 Work on 20 PCs and helped standardize software installation, verification and troubleshooting procedures.
- Assisted with enterprise tools and access workflows, documenting resolutions and escalating infrastructure issues as needed.

Professional Development & Technical Training | Saint-Lambert, QC | Oct 2024 – Jun 2026

- Completed studies in Cybersecurity: Prevention and Intervention (qualification awarded Feb 2026) and IT Cloud Administration (qualification awarded Sep 2026) at Champlain College.

Freelance Information Technology Consultant | Self-Employed | Longueuil, QC | Apr 2019 – Sep 2024

- Developed, maintained and supported business applications using C#/.NET, SQL Server and REST APIs, improving existing functionality for operational workflows.
- Diagnosed and resolved application, database, authentication, web-server and deployment issues across front-end and back-end components.
- Provided functional testing, user support and technical documentation; worked with IIS-hosted applications and database environments.

Process Engineer | PDVSA, Petroleum Refinery | Puerto La Cruz, Venezuela | May 2014 – Mar 2019

- Collaborated with operational and technical teams on process improvements, reporting requirements and documentation of business workflows.

ERP Analyst | PDVSA, Petroleum Refinery | Puerto La Cruz, Venezuela | Mar 2013 – May 2014

- Supported ERP end users, incident resolution, functional testing and business reporting with technology and operations teams.

SELECTED SOFTWARE & CLOUD PROJECTS

GiveSwap | Full-Stack Marketplace | giveswap.com

- Developed a React/Next.js and TypeScript marketplace with Node.js and REST APIs; integrated AWS Cognito, Aurora PostgreSQL, DynamoDB and S3 for authentication, data and storage, with Git/GitHub and CloudWatch for release testing.

Drones Latinoamérica | Bilingual Content Platform | drones-latinoamerica.com

- Created and maintained a two-language technical content website with categorized resources and responsive navigation.

SysSign Inspector Pro & ClearZonePC | Windows Utilities

- Developed two utilities for Windows security and maintenance, including process inspection, signature checks, storage review and software management.

EDUCATION

Bachelor's Degree, Systems Engineering | Santiago Mariño Polytechnic University, Venezuela | 2011

AEC, IT Cloud Administration | Champlain College, Saint-Lambert, QC | Sep 2026

AEC, Cybersecurity: Prevention and Intervention | Champlain College, Saint-Lambert, QC | Feb 2026
